

Date: April 2012
Type of product: Power Monitors
Name of product: ENERIUM[®] 30

Simplicity and performance with ENERIUM[®] 30, the entry-level power monitor from the Enerdis[®] brand

ENERDIS, the undisputed expert in energy management and electrical network supervision, is now consolidating its technological leadership by offering a **simple, high-performance entry-level power monitor** to cover the basic requirements for electrical power consumption monitoring.

Quick programming and intuitive navigation

ENERIUM 30 power monitors **can be programmed without a computer in less than five minutes**. Specially designed for easy programming, it offers simple, effective navigation with just two buttons on the front panel.

- A user-friendly interface for quick, simple navigation
- Direct access to the data on the front panel

The **ENERIUM[®] 30** is equipped with a backlit graphic LCD screen to ensure that the data are easy to read.

Performance

The latest model in the **ENERIUM[®]** range of power monitors, with functions long-acknowledged on the market, the **ENERIUM[®] 30** provides switchboard operators with an effective solution for monitoring electrical power consumption according to the EN 61557-12 and IEC 62053-22 standards.

- Energy measurement in all 4 quadrants
- Measurement of all the electrical network data with 1s, min, max and average values
- One on-off output and one alarm/pulse output
- RS485 communication output for ModBus in RTU or ASCII mode
- A special kit is proposed for mounting on a DIN rail or plate

The **ENERIUM[®] 30** also offers **gauge displays** for simpler load-factor monitoring.

Take full advantage of all the possibilities to improve energy performance

Managing and securing an electrical power supply means monitoring, checking and protecting the whole network at all times. It also means optimizing the pricing of energy consumption without affecting activity and without reducing safety or comfort. This requires a global, real-time view of the electrical parameters across the whole installation, thus guaranteeing correct sizing. Whatever your sector, whether energy, industry, tertiary or residential, there are products and services from **ENERDIS[®]** at all levels to optimize your productivity, flexibility and costs.
